

IR265 July 2021

General depreciation rates

The information in this guide is based on current tax laws at the time of printing.

Introduction

General depreciation rates

This guide sets out the general depreciation rates for both diminishing value (DV) and straight line (SL) that apply to assets acquired in the 2006 and later tax years.

Inland Revenue sets the depreciation rates in the form of general and provisional determinations for all depreciable assets, other than fixed-life intangible depreciable assets or excluded depreciable assets, based on an asset's estimated useful life.

New determinations and provisional determinations are published on **ird.govt.nz** and in our *Tax Information Bulletin* (TIB).

For more detailed information on fixed-life intangible assets see the **Depreciation - a guide for business - IR260**. Excluded depreciable assets must be depreciated using the historic rates - see our guide **Historic depreciation rates -IR267**, available on our website **ird.govt.nz** under "Forms and guides".

Our online depreciation rate finder allows you to quickly search for assets across all industry and asset categories.

The depreciation rates are set out in industry and asset categories. Assets which are unique to one or two specific industries are listed under the industry category. Assets which are typically used in a variety of different industries (for example, tanks, boilers and heating) are listed under the asset category.

Assets are listed alphabetically within each industry and asset category. The following details are shown for each asset:

- Column 1 the estimated useful life
- Column 2 the DV rate
- Column 3 the SL rate

Depreciation loading

Before 21 May 2010, a 20% loading could be applied to the DV or SL depreciation rate in certain cases. The loading accelerated the depreciation of eligible assets. It generally applied to new assets never used or held for use in New Zealand and imported second-hand assets. The asset must have been purchased after the beginning of the 1995-96 income year.

For buildings, imported used cars, second-hand assets acquired in New Zealand and depreciable intangible property, the 20% loading didn't apply.

Any asset purchased on or after 21 May 2010 isn't entitled to the 20% depreciation loading. However, if you entered into a contract to purchase an asset on or before 20 May 2010, you can still depreciate this asset with the loading.

Any asset being depreciated at a rate with loading before 21 May 2010 can continue to be depreciated at that rate for that asset's lifetime. However, if there is a capital improvement to an asset with the 20% loading, this improvement will need to be depreciated separately from the original asset, and will be depreciated without the loading allowance.

The general depreciation rates, including the 20% loading, are listed in the table on the following page.

Special rules that apply to buildings

Buildings acquired on or after 19 May 2005 must apply the rates from the 2005-06 year except:

- buildings acquired as relationship property or under a wholly owned group company transfer that the previous owner depreciated using the old building depreciation rates - in which case those rates continue to apply, and
- buildings that were purchased, or to be built, and the relevant contract was signed prior to 19 May 2005, the old building depreciation rates also continue to apply.

		2006 and future	years asset rates			
	Assets other than buildings acquired on or after 1 April 2005			Buildings acquired on or after 19 May 2005**		
DV rate (%)	DV rate +20% loading (%)*	SL rate (%)	SL rate +20% loading (%)*	DV rate (%)	SL rate (%)	
2	2.4	1.5	1.8	1.3	1	
4	4.8	3	3.6	3	2	
6	7.2	4	4.8	4.5	3	
8	9.6	6	7.2	6.5	4	
10	12	7	8.4	8.5	5	
13	15.6	8.5	10.2	11	6.5	
16	19.2	10.5	12.6	13.5	8	
20	24	13.5	16.2	0	0	
25	30	17.5	21	0	0	
30	36	21	25.2	0	0	
40	48	30	36	0	0	
50	60	40	48	0	0	
67	80.4	67	80.4	0	0	
100	100	100	100	0	0	
100	100	100	100	0	0	

* The 20% depreciation loading doesn't apply to assets acquired after 20 May 2010.

**For buildings, depreciation will reduce to 0% from the 2011-12 income year where they have an estimated useful life of 50 years or more.

Between the 2012 and 2020 income years, depreciation on buildings was reduced to 0% where buildings have an estimated useful life of 50 years or more. This applied to both commercial and residential properties, including leasehold property, and regardless of when the building was acquired.

For the 2021 and subsequent income years, the depreciation rates of 2% DV and 1.5% SL were introduced for non-residential buildings with an estimated useful life of 50 years or more. Although a 0% depreciation rate continues to apply to residential buildings, they remain in the tax base and when they are sold for more than the book value, an adjustment will be required for any depreciation (claimed prior to the 2012 income year) recovery.

Estimated useful life

The estimated useful life of an asset is the period over which an asset might reasonably be expected to be useful in earning income in New Zealand. The fact that an asset may have been previously used for a purpose other than deriving income (for example, private use) or carrying on a business overseas won't reduce its estimated useful life.

Maximum depreciation claims

Whether you're using the straight line (SL) or diminishing value (DV) method you can't claim depreciation in excess of the cost price/value of the depreciable asset. To make sure you don't claim more depreciation than you're entitled to, you need to keep a track of the adjusted tax value of the asset. You'll need to keep a fixed assets register with the following information:

- a description of the asset
- original purchase price or valuation
- date the asset was acquired and the date in service
- estimated useful life of asset
- depreciation method to be used for the asset
- percentage of private use if any
- the adjusted tax value for each year. You use this information to complete a depreciation schedule.

Example

Depreciation Adjusted Original Depreciation claimed tax value cost rate Year 1 \$1,200 13.5% \$162.00 \$1,038 Year 2 \$1,200 \$876 13.5% \$162.00 Year 3 \$1,200 13.5% \$162.00 \$714 Year 4 \$1,200 13.5% \$162.00 \$552 \$390 Year 5 \$1,200 13.5% \$162.00 Year 6 \$1,200 13.5% \$162.00 \$228 Year 7 \$1,200 13.5% \$162.00 \$66 Year 8 \$1,200 13.5% \$66 \$0.00

1 April 2011 Simone purchases a dishwasher for

depreciation method the rate is 13.5%.

\$1,200, used 100% for business. Using the straight line

Simone can claim \$162.00 for the first seven years. However, in the eighth year the final claim is \$66.00. This is because the dishwasher's adjusted tax value is less than the original calculated depreciation of \$162.00. The amount of depreciation claimed can't exceed the adjusted tax value so no further depreciation can be claimed on the dishwasher after year seven.

Buildings and building fit-out asset categories

The term "building" can have various meanings depending on the context in which the term is used.

A building in ordinary circumstances is defined as:

- a structure of considerable size
- permanent in the sense that it's intended to last a considerable time
- enclosed by walls and a roof
- able to function independently of any other structure. However, a building is not necessarily a physically separate structure.

Interpretation statement 10/02 "Meaning of 'building' in the depreciation provisions" provides a full explanation and can be found in the Tax Information Bulletin, Vol 22, No 5 (June 2010). The chattels and fit-out of a building, where it doesn't form part of the building, can still be depreciated. Interpretation statement 10/01 "Residential rental properties - Depreciation of items of depreciable property" sets out a three-step test that Inland Revenue will apply to determine whether an item can be separated out or whether it's seen as being part of the building. You can find this in the **Tax Information Bulletin, Vol 22, No 4 (May 2010).**

How to find the right rate

Follow this step-by-step process to find the right depreciation rate.

- 1. See the "Industry" category list in the contents pages. If there is an appropriate industry category for your industry and your asset is listed there, use that depreciation rate (either DV or SL), otherwise go to step 2.
- 2. See the "Asset" category list in the contents pages. If there is an appropriate asset category and your asset is listed, use that depreciation rate (either DV or SL), otherwise go to step 3.
- 3. If the asset is listed under an industry category (step 1) which isn't your main industry, and you use the asset in a similar way to the industry shown, use that depreciation rate (either DV or SL), otherwise go to step 4.
- 4. If none of the first three steps apply, use the default class from the appropriate asset category if the description of the default class is applicable to your asset.
- 5. If none of the first four steps apply, use the default class rate from the appropriate industry category if the description of the default class is applicable to your asset.
- 6. Where there is no appropriate listing for your asset under an industry or asset category, you can apply for a provisional depreciation rate.

You can search for a specific asset across all industry and asset categories using our depreciation rate finder at ird.govt.nz.

2006 and future years asset rates

(Use for assets other than buildings acquired on or after 1 April 2005, and buildings acquired on or after 19 May 2005)

Part 1 -

Industry categories	Page
Agriculture, horticulture and aquaculture	6
Audio and video recording studios and	
professional photography	7
Bakeries	8
Battery manufacturing	8
Brewing, winemaking and distilleries	8
Cable making	9
Cement manufacturing	10
Chemical plant (including soap, detergent, paint, glu	e,
starch, colour, personal products and fertiliser)	10
Cigarette manufacturing	11
Cleaning, refuse and recycling	12
Concrete and plaster	12
Contractors, builders and quarrying	13
Dairy plant	14
Electrical and electronic engineering	
(for test equipment see also Asset category:	
"Scientific and laboratory equipment")	15
Engineering (including automotive)	15
Fishing (see also "Meat and fish processing")	17
Food processing	18
Footwear manufacturing	19
Glass	20

Metal industries (primary) and foundries	28
Milling (including grain handling and seed cleaning)	29
Mining (see also "Contractors, builders	
and quarrying")	29
Oil and gas industry	30
Packaging (excluding plastic packaging)	31
Pharmaceuticals	31
Plastics	31
Pottery, tile and brick making	32
Power generation and electrical reticulation systems	33

Printing and photographic (see also "Audio and video	
recording studios and professional photography")	34
Pulp and paper manufacturing	35
Residential rental property chattels	36
Rubber and tyre manufacturing	36
Shops	37
Tanning and fellmongering	38
Telecommunications (see also "Telephone systems"	
under Asset category: "Office equipment and	
furniture")	39
Textile, garment and carpet manufacturing	40
Timber and joinery industries	41
Undersea maintenance (where equipment used under	
salt water or on a maintenance barge on salt water)	42

Part 2 -

Asset categories	43
Building fit-out (when in books separately from	
building cost)	43
Boilers and heaters (where not industry specified)	44
Books, music and manuscripts	44
Buildings and structures	45
Clothing	46
Compressed air plant (where not industry specified)	47
Computers	47
Factory and other sundries	47
Hire equipment	48
Hire equipment (short-term hire of one month	
or less only)	48
Lifting (LIFT)	50
Office equipment and furniture	50
Pet grooming and cleaning equipment	51
Pumping sets (where not industry specified)	51
Refrigeration	52
Reticulation systems, including power generation	
(excluding electrical, communications and gas	
reticulation)	52
Scientific and laboratory equipment (excluding	
equipment used in a medical laboratory)	52
Software	53
Tanks, vats and reservoirs (where not industry	52
specified)	53
Transportation	54
Water and effluent treatment (where not industry	56
specified) Waishing mashings (where not inductive aposition)	56 57
Weighing machines (where not industry specified)	37

Part 1 2006 and future years asset rates
