

3 April 2024

[Redacted]
[Redacted]
[Redacted]

Dear [Redacted]

Thank you for your request made under the Official Information Act 1982 (OIA), received on 18 March 2024. You requested the following information for each of the specific ANZSIC Codes outlined in Appendix A:

...The data requested as specifically related to those codes, and separated out each code, is:

- *The total number of businesses*
- *Total Expenditure*
- *Total Gross Revenue*
- *Total Net Income*
- *Total Income Tax Paid (i.e Tax Income Revenue for the Crown)*

On 19 March 2024, we spoke to you, and you clarified the following for your request.

- The total number of businesses: *The total number of taxpayers with the relevant industry code*
- Total expenditure: *the GST total expenses (if it exists) or the IR10 total expenses (if it exists)*
- Total Gross Revenue: *GST total sales (if it exists) or the IR10 total income (if it exists)*
- Total Net Income: *Taxable income*
- Total Income Tax Paid: *Tax on taxable income for individuals and residual income tax (RIT)¹ for everyone else*

We also advised you that the data for the 2023-24 financial year would be incomplete as taxpayers with tax agents have until 31 March 2024 to file their tax returns. You confirmed that you would like the data for the full 2021-22 financial year, as well as the partial data for the 2022-23 financial year.

Information being released

The information you have requested is provided in the attached spreadsheet. The industry data held by Inland Revenue may not necessarily reflect the current industry for some taxpayers as

¹ Residual income tax is the amount of income tax payable by a taxpayer after deducting tax credits but before deducting any provisional tax paid.

activities can change and may not have been updated. For example, an individual may have a “book publishing” industry classification on Inland Revenue’s system but be retired or no longer working in that field.

In the attached spreadsheet, taxpayer counts have been rounded to the nearest 10, and values are expressed in \$millions rounded to the nearest \$0.1m. For each industry group I have provided information for four distinct categories of taxpayers:

- 1) The taxpayer that is registered with the industry classification, but we have not received any income or GST return,
- 2) The taxpayer is registered with the industry classification, and we have received an income tax return for the year but do not have any turnover information (they have not filed a GST return, and did not supply an IR10 with their income tax return),
- 3) The taxpayer is registered with the industry classification, and we have received a GST return for the year but do not have any income information, and
- 4) The taxpayer has the industry classification, and we have both the turnover and income tax information.

There are several industry classifications where the information is presented differently – categories 2) and 3) are combined. This has been done to ensure that confidentiality rules are not breached. In addition, I have also had to suppress sales and expenses data for two industry classifications for the same reason. The affected industry classifications are:

- J551400 Post-production services and other motion picture and video activities
- J552100 Music Publishing
- J562100 Free-to-air television broadcasting
- J562200 Cable and other subscription broadcasting
- J602000 Other information services

Publishing of OIA response

We intend to publish our response to your request on Inland Revenue’s website (www.ird.govt.nz) as this information may be of interest to other members of the public. This letter, with your personal details removed, will be published in its entirety. Publishing responses increases the availability of information to the public and is consistent with the OIA's purpose of enabling more effective participation in the making and administration of laws and policies and promoting the accountability of officials.

Thank you for your request.

Yours sincerely

Sandra Watson
